FORMATION

ENGINEERING DIPLOMA - COMPUTER ENGINEERING BIG DATA & CLOUD COMPUTING
2022 - 2025
ENSET Mohammedia - Marocco

UNIVERSITY DIPLOMA OF TECHNOLOGY - COMPUTER ENGINEERING
2020- 2012
EST Essaouira – Marocco

TECHNICAL SKILLS

- **Web Development:** Spring Boot, React.js, Bootstrap, Node.js, TailwindCss, Next.js.
- **Version Control:** Git, GitHub
- **Programming / Scripting:** Python, Java
- **Databases:** MySQL, MongoDB
- **Machine Learning / AI:** Scikit-learn, TensorFlow, PyTorch
- **Data Engineering / ETL:** BigQuery, Snowflake, Hadoop, Apache Spark, Kafka, DBT, SQL
- **Data Visualization / BI:** Power BI, Looker, matplotlib, Seaborn, Streamlit
- **Cloud / DevOps:** GCP, Oracle Cloud, Docker
- **Project Management:** Scrum, Scrumban

LANGUAGES

- Arabic - Natif
- French - Conversational
- English - Professional proficiency

SOFT SKILLS

- Analytical Thinking / Problem Solving
- Attention to Detail
- Teamwork & Collaboration
- Adaptability / Learning Agility

PROFILE

Data & Software Engineer, specialized in Big Data & Cloud Computing, passionate about designing **scalable data pipelines** and building high-quality **full-stack applications**. I transform complex data into actionable insights and robust digital solutions using modern technologies such as **Python, Spring Boot, React, cloud platforms and Snowflake**. Curious, and driven by continuous learning, I am committed to delivering reliable and impactful solutions. **Available immediately**.

WORK EXPERIENCE

DATA & FULL-STACK DEVELOPER - INTERNSHIP

September 2025 – December 2025 (Remote) MidAtlas - Canada

Project 1: Tendly - Automated Data Platform

- Developed an automated data platform for web scraping, processing, and visualization
- Built pipelines with Python (Selenium, Playwright) and AI APIs (OpenAI GPT, Anthropic Claude) to extract and parse product data from multiple websites
- Managed structured data in PostgreSQL and automated supplier search via Google
- Created a web app using ReactJs, TypeScript, Tailwind CSS, and Node.js for KPI dashboards and user management

Project 2: COD-Dashboard - E-commerce Analytics Platform

- Integrated Shopify COD Network API to retrieve and process order data in real-time
- Connected and synchronized multi-platform advertising data from Snapchat, TikTok, Google Ads, and Facebook Ads APIs
- Developed automated campaign tracking system to monitor marketing spend and ROI across platforms
- Built centralized dashboard for cross-platform performance analysis and data visualization

Tech stack: Python, Selenium, Playwright,Serper, OpenAI GPT, Anthropic Claude API, PostgreSQL, ReactJs, TypeScript, Tailwind CSS, Node.js, Shopify API, Social Media APIs (Snapchat, TikTok, Google, Facebook), Webhook, Github action, Rebder, Vercel.

FULL-STACK DEVELOPER - FREELANCE PROJECT

August 2025 - September 2025

- Developed a healthcare app, helping patients connect with nearby nurses.
- Built responsive web and mobile interfaces and implemented a RESTful API for smooth interaction.
- Managed database design and real-time geolocation features for user matching.

Tech Stack: React.js, Node.js, React Native, PostgreSQL

EXTRACURRICULAR EXPERIENCE

- **BEC Digital Marketing Challenge** with AI – Created and pitched digital marketing projects leveraging artificial intelligence. 2024
- **President** of DigiGirlsENSETM-4 Program – Led the program to empower young women in digital skills and technology 2024
- **Mentor** – DigiGirlz Morocco
- Guided participants in exploring careers in technology and developing digital competencies. 2024
- **Orange Mega Hackathon**
- **Developed innovative solutions** on the theme of democratizing Video Assistant Refereeing (VAR). 2023
- **NEXT GEN Hackathon – EMSI Rabat** Participated in a national hackathon 2023

CERTIFICATS

- **Exploratory Data Analysis IBM** April 2024
- **Python for Data Science IBM** February 2024
- **Certification MongoDB Atlas** December 2023
- **English for IT 1 Cisco Networking Academy** December 2023
- **IT Essentials Cisco Networking Academy** May 2023
- **NDG LINUX ESSENTIALS Cisco Networking Academy** May 2023
- **Networking Essentials Cisco Networking Academy** February 2023

DATA & SOFTWARE ENGINEER - END OF STUDIES INTERNSHIP

February 2025 - August 2025 Theodo morocco-Casablanca

Full-Stack development

- Built a mobile app for geolocated field data entry and a web dashboard for map visualization and real-time analytics.
- Worked on an e-commerce platform during onboarding, using Spring Boot, Java, and Next.js, and was later staffed on this project to enhance backend and frontend integration.
- Applied Lean methodology with sprints and Kanban.
- Developed an automated ETL workflow using Python and SQL to extract, transform, and load multi-source data (Excel & Airtable).
- Processed and centralized cleaned data in Snowflake for analysis and reporting.

Data Engineering & Analyst

- Built interactive Streamlit dashboards to visualize KPIs and deliver real-time insights for decision-making.
- Developed an automated ETL workflow using Python and SQL to extract, transform, and load multi-source data (Excel & Airtable).
- Processed and centralized cleaned data in Snowflake for analysis and reporting.
- Built interactive Streamlit dashboards to visualize KPIs and deliver real-time insights for decision-making.

Tech stack: Next.js, React Native, Supabase, Spring Boot, Java. Python, SQL, Snowflake, Streamlit

AI ENGINEER - INTERNSHIP

August 2024 – September 2024 3D SMART FACTORY - Mohammedia

- Enhanced a YOLOv9-based platform for detecting personal protective equipment with a real-time alert system to ensure workplace safety.

Tech stack: YOLOv9, Python, Computer Vision, Pygame, Streamlit

FULL-STACK DEVELOPER - INTERNSHIP

July 2024 – August 2024 CCIS - Essaouira

- Expanded an application to automate CCIS services and performed data analysis with graphical visualizations.

Tech stack: React.js, Node.js, Python, Excel, Git, Github

FULL-STACK DEVELOPER - INTERNSHIP

July 2023 – August 2023 REDAL AGENCY- RABAT

- Built a task management application to optimize employee task assignment and tracking.

Tech stack: React.js, PHP, SQL, MySQL, Git, Github

FULL-STACK DEVELOPER - INTERNSHIP

April 2022 – June 2022 CPM - Essaouira

- Improved a desktop application ensuring full traceability of daily agent-server connections, enhancing network security.

Tech stack: Python, Tkinter, SQL, MySQL Database, Git, Github.

FULL-STACK DEVELOPER - INTERNSHIP

June 2021 – July 2021 Urban Agency –Essaouira

- Designed and created the agency's website.

Tech stack: HTML, CSS, JavaScript, PHP, Git, SQL, MySQL Database, Github.
